Dear Business Professional:

Thank you for your interest in WorldLegacy's curriculum. Our position in the world of professional and personal coaching is unique. Unlike many motivational or personal effectiveness seminars available today, our workshops provide our students with "hands on" tools that are designed to create maximum effectiveness and results.

Our workshops offer an excellent opportunity for you to enhance what's already working in your organization and take it to the next level. In addition, you can examine the *root* of what's not working and alter it so that a foundation can be established for solid, long- term growth. An added advantage of the workshops is their "in the trenches" nature coupled with myriad "step back and notice" opportunities, so that your employees can have an honest look at themselves in action. Many corporate decision makers have found that the trainings result in:

- Effective, efficient leadership;
- Increased sales revenue;
- Improved communication skills,
- Improved and increased team production;
- A positive, "can do" approach to life;
- Clarity in business goals.

WorldLegacy is committed to providing your company and employees with quality education that produces powerful, long-term *results*. Please feel free to contact the staff with further questions on how we can be your partners in supporting you to exceed your company's objectives. We look forward to working with you to win your game!

The Breakthrough (Breakthrough Part I)

Breakthrough I is an intensive workshop in which participants examine the underlying assumptions that shape how they view the world and what they believe they can accomplish. Conducted on an experiential learning model, Breakthrough I provides an environment in which people move beyond past limitations and take decisive action consistent with the commitments they choose.

A highly interactive structure is designed for each student to participate fully and to gain the maximum value from the course. Dynamics of Breakthrough I include a powerful series of presentations, processes, paired and group interactions, and personal coaching -- all focused on questions at the heart of humanity, and key to leading a successful and rewarding life.

While direct benefits of Breakthrough I depend on the questions and concerns that each student brings, the value of the material is focused primarily on four areas: relationship, accomplishment, responsibility, and contribution.

Through Breakthrough I participants will:

- Experience a profound shift in how they relate to themselves, fellow workers and clients.
- Enhance their ability to accomplish extraordinary results with less effort and in a shorter period of time.
- Experience being profoundly connected to people and what matters to them.

Time: One evening and three full days with one follow-up session.

Prerequisite: Age 18 and over.

The Breakthrough (Breakthrough Part II)

In Breakthrough Part II, participants explore more fully the real-life, practical applications on insights gained in Breakthrough I. During the five-day program, students invent their vision for a future not derived from the past; learn to access and apply their own creative resources; and move forward in action to deliver on the commitments they choose.

Breakthrough Part II provides rigorous and directed coaching appropriate to each student's intentions and goals. Lecture and discussion are combined with frequent paired and small or large group interaction, providing a range of environments and styles that develop the students' capacity to relate and to learn effectively in any situation.

Through Breakthrough Part II participants will:

- Create living life boldly and passionately.
- Act from their heartfelt commitments now.
- Recognize and profoundly experience appreciation for the unique ways of being and qualities that you contribute to others.
- Live life effortlessly.
- Communicate in a way that inspires, moves, and empowers others.

Time: Five full days and one follow-up session
